- ⑤ OUR QUALITY PROGRAMME
- ⑥ OUR MANUFACTURING COMPANY
- ⑦ OUR TEAM
- ⑧ CLIENT LIST
- ⑨ CONTACT US

Our company was established in 1994. We have become a "niche" supplier, by this we mean we are set up to react quickly and efficiently to site emergency requirements. We operate 7 days a week and this flexibility ensures that you are able to contact Petropipe Nigeria at any given time.

From our company name you may think that we only supply pipe, and accessories, in fact we supply a diverse range of products along with our standard range of valves, pipes & fittings. During the last decade we have supplied items to various large projects outside of our core product range, if you need any item quickly we can assist in sourcing and shipping to meet your deadlines.

In 2005 Petropipe expansion programme consisted of recruiting specialist staff for our new project department in UK and Nigeria This team will deal with all aspects of project work from enquiry stage to completion of deliveries to site and the supply of all correct documentation.

We are confident that with a local presence, we can enhance our service levels to our clients. Our emphasis is to ensure our clients receive quality service before during and after any orders are executed, we know we have the expertise to ensure that happens.

# OUR VISION

Petropipe Nigeria works on the principle of treating each enquiry as very urgent, as a company we will always try to ensure that the enquiry is quoted on time with the correct documentation...

We have a global network of suppliers who are chosen based on their strategic location and manufacturing capabilities. All our partners understand that our requirements are always urgent, they have put into place systems which enable "off the shelf" items to be fast tracked with all the necessary export packing & documentation in place so we can deliver the material on time to our clients.

We have recently supplied Duplex Ball valves to our client in Nigeria within 6 weeks from date of order, our sister company manufacturer was able to understand and work with our client's very urgent requirements.

Our core business is pipeline products that are treated by other suppliers as something difficult or special to make, this is when we will always try to find you a solution in the timeframe you need.

# OUR PRODUCT

## ***PIPES***

Low temperature, and high temperature, stainless steel and Duplex pipes, both Seamless and Welded. We can supply pipes from ¼ inch to 48inch in all wall thickness and also high yield carbon steels, we have facilities to cut pipes to specific sizes, all types of NDT are available on any type of Pipe

## ***VALVES AND CONTROLS***

We manufacture by our sister company GATE, GLOBE, CHECK, BALL, BUTTERFLY, PLUG, SAFET RELEIF VALVES AND DOUBLE VBLOCK AND BLEED VALVES. We also have specific agreements with all major manufacturers around the world to supply their product ranges. We also make Y Type and Duplex Strainers, Control Valves, API 6A Valves, and our inhouse Engineering Department can supply Actuated Packages to suit the clients needs.

## ***FASTENERS AND GASKETS***

We supply specialist type of fasteners in special materials off the shelf, specific coatings are always available on short delivery times. We have global access to manufacturers of gaskets in all materials.

## ***PIPE FITTINGS***

Low temperature, and high temperature, stainless steel and Duplex pipe fittings, both Seamless and Welded. We can supply Socket weld and butt weld pipe fittings and flanges from ¼ inch to 48inch in all wall thickness and also high yield carbon steel materials

## ***SKIDS***

We have an inhouse design department that can design, manufacture and supply a complete package

# OUR QUALITY PROGRAMME

Petropipe Nigeria Ltd believes that maintaining high standards of Health, Safety and Environmental management are an integral part of the business performance and will be given equal standing with other business objectives. Petropipe Nigeria Ltd are committed to providing a safe and healthy working environment for its employees, contractors, visitors and anyone else who may be affected by its activities.

The HS&E management system provides compliance with all relevant UK HS&E legal requirements and any other relevant HS&E requirements. The Company will identify the risks to health, safety and the environment from its operations, not only to its employees but to others, such as customers, contractors and visitors. These risks will be reduced and/or managed as far as is reasonably practicable through:

- Commitment to accident prevention by assessing HS&E risks & impacts arising from working practices and procedures and introducing appropriate measures to prevent, minimize or control significant risks & impacts.
- Commitment to prevention of pollution by setting, meeting, and exceeding objectives & targets where possible.
- Providing all necessary safety devices, protective equipment and abatement equipment, appropriate training, specialist training and supervision, ensuring that all such equipment and instruction is maintained and that correct procedures are observed.
- Providing a system of consultation with employees to stimulate continuous improvement and promote good HS&E practices.
- Taking every legitimate opportunity to promote a positive HS&E culture and continually improve HS&E management and performance.
- Monitoring where necessary, the exposure to employees, contractors, visitors and any other people who may be affected by hazardous situations, utilising all appropriate forms of health surveillance.
- An adequate and progressive program of training to ensure that employees are fully aware of their responsibilities under Petropipe Nigeria Ltd's rules and regulations and to ensure that employees are aware of their responsibilities under relevant HS&E legislation.
- Effective management and utilisation of resource, dedicating suitably trained and qualified resource to all HS&E matters.
- Developing installing, maintaining and reviewing environmental management systems to enable Petropipe Nigeria Ltd to meet or exceed current environmental targets & legal requirements.
- Reducing Petropipe Nigeria Ltd's carbon footprint by exploring and implementing energy saving initiatives, materials, and processes where possible.
- Careful selection and use of material I substances and management of waste with the view to minimise its production where possible or suitably disposing of waste through recycling schemes or other appropriate methods.

# OUR MANUFACTURING COMPANY

EDMUND VALVE COMPANY (1965) LTD is our sister company under common management, we manufacture a wide range of valve products for the Oil, Gas & Petrochemical industries including Wafer Check Valves, Trunnion Mounted & Floating Ball Valves, Pressure Sealed Bonnet Gate, Globe & Check Valves, and Y type Strainers. You will see our brand name EVC on all the valves we produce.

The company's core business is manufacturing these types of valves on short delivery times, with a sophisticated manufacturing programme our Engineering Department can produce high quality valves within the tight deadlines that today's global projects require. Through bespoke engineering, we can manufacture small & large quantities in exotic materials such as those shown below. More details are available through the Product selector and Download sections.

## MATERIALS USED

HASTELLOY C276; INCONEL 625 / 825; MONEL A494 CW12MW; SUPER DUPLEX UNS S32750; DUPLEX UNS S31803, 6Mo ASTM A351 CK3MCuN; CHROME MOLY ASTM A217 C12, WC9, WC6, C5; STAINLESS STEEL : ASTM A351 CF8M, CF3M, CF8, CF8C; CARBON STEEL: ASTM A216 WCB / WCB, ASTM A105N, ASTM A352 LCB/LCC, ASTM A350 LF2.

Each of the products shown can be customised to suit the client's requirements, we can provide Cryogenic extensions, Actuation packages, Steam Jackets, and client specific valve modifications. We also have the facilities for special testing including RADIOGRAPHY, FUGITIVE EMISSION TESTING, PMI, MPI, CRYOGENIC TESTING. All our products are tested in accordance with the relative standards prior to leaving the factory, and certified according to EN 10204 standards. All products are CE marked according to the Pressure Equipment Directive if required.

The management team of EDMUND VALVE COMPANY place huge emphasis on employing high quality staff who are motivated through the company's quality policy to ensure our clients' requirements are met on every project. Only through using the skills of the design team and state of the art production facilities are we able to meet our clients' exacting demands and ensure compliance with the company's ISO 9001:2015 quality management system.

# OUR TEAM

Petropipe Nigeria, has a team of professionals based in UK and Nigeria, we have over 35 years management experience and a dynamic Board of Directors who are focused on driving our business forward.

The company policy of ensuring our staff are loyal, committed to our business and have a clear vision of quality and safety means they take pride in their work, we have a programme of investing in young people and teaching them our philosophy, and offering them a career path to enjoy.

With a balance of experience and dynamic youth we are prepared for today and also looking forward to the future with confidence
